DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, figures 1, 2, and 4

Species II, figures 3 and 5

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 11 and 14 are generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Response to Arguments

8. Examiner notes receipt of applicant's election on May 19, 2005, in response to the restriction requirement of April 19, 2005. However, to better define the species, examiner has included a further restriction requirement. It is also noted that in the election of May 19, 2005, applicant elected species I, depicted in figures 1 and 2, and claims 6-8 and 11-13. Examiner believes claim 13 is drawn to the invention shown in figure 3, not figures 1 and 2, because of the location of the stock bearing and the step, which are both recited in the claim. The specification describes the claimed "step" as portion 89 or 91c in the drawings. This element is not a feature of the species shown in figures 1 and 2.

9. Regarding applicant's traverse of the restriction requirement of April 19, 2005, applicant argues that only one search is required for all of the variations claimed in the instant application,

Art Unit: 3677

and would be classified in the same class and sub class. Examiner notes that in a restriction based on species, there must be a patentable difference between the species as claimed. Since the claims are directed to independent inventions, restriction is proper pursuant to 35 U.S.C. 121, and it is not necessary to show a separate status in the art or separate classification. See MPEP 808.01(a). The inclusion of a step, and the different location of the bearings shown in figures 3 and 5 appear to make this species distinct from the species shown in figure 1, 2, and 4.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Kyle whose telephone number is 571-272-7057. The examiner can normally be reached on Monday - Friday, 8:30 am - 5:00 pm.

11. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
